Availability: international remote collaboration through a compliant arrangement suited to the role.

Profile

Confirmed and highly autonomous Full-Stack Developer who turns operational needs into deployed, maintained and used web/mobile products. End-to-end experience across B2B SaaS, back offices, APIs, PostgreSQL, field applications, payments, security, testing and production.

Core skills

Web product: React, TypeScript, Next.js, Vite, PWA, dashboards, B2B back offices, technical SEO, public tracking, complex forms and local synchronization.

Backend and APIs: Python, Django, Django Ninja, Node.js, Next.js API, Express.js, PostgreSQL, Supabase, Prisma, Sequelize, REST, OpenAPI, webhooks, workers and outbox.

Mobile and field: Android Kotlin, Jetpack Compose, Flutter, WorkManager, Room/SQLCipher, Android Keystore, FCM, local storage and offline synchronization.

Data, security and quality: PostgreSQL, RLS, RBAC, multi-tenancy, audit logs, HMAC, AES-256-GCM, secrets, pytest, Vitest, Playwright, Docker, Linux and runbooks.

Professional experience

TechZone IT Solution | Confirmed Full-Stack Developer / Technical Lead

October 2024 - present | Fianarantsoa, Madagascar

TZ Smart - network operations, field service and payment SaaS | <https://tzsmart.app>

- Designed a modular Django Ninja/PostgreSQL backend by business domain, with contract-first APIs, OpenAPI, RBAC, validation and regression tests for web and Android clients.
- Delivered a React/Vite back office and Kotlin Android application covering network diagnostics, field operations, offline/replay, FCM and MVola payments.
- Operated production with health checks, watchdogs, runbooks, sensitive-data protection and recovery procedures.

Fretunia / Trackmada - multi-tenant B2B logistics SaaS | <https://fretunia.com>

- Built a multi-tenant Supabase/PostgreSQL architecture with RLS, RBAC, memberships, API keys, webhooks, audit logs and tenant isolation.
- Delivered parcel, batch, PDF invoicing, pricing, public tracking, customer sites, custom domains and outbox/n8n notification modules.
- Contributed to a platform used by more than 20 companies in Africa, with auth, billing, tenant, RLS and cross-tenant tests.

B2B social-commerce orchestrator | <https://www.iagasy.com/>

- Built a multi-tenant Next.js/Supabase/PostgreSQL SaaS with Meta webhooks, message queues, workers, an agent endpoint, a knowledge base and n8n automation.
- Delivered a RAG pipeline with ingestion, chunking, embeddings, ChromaDB, intent detection, reranking, confidence thresholds, fallback and human handoff.
- Secured flows with X-Hub-Signature-256, AES-256-GCM token encryption, deduplication, stale-event rejection and controlled go-live scripts.

Selected full-stack web and mobile client deliveries

SBT Travel - administrable full-stack web platform | <https://sbt-travel.mg>

- Scoped and delivered an end-to-end React platform with a Next.js/Node.js backend, PostgreSQL, authentication and content back office; technical SEO, VPS deployment and production maintenance.

RMB Cargo - independent full-stack logistics platform | <https://www.rmb-cargo.mg>

- Delivered a mobile-first PWA with a React frontend, Next.js/Node.js backend, PostgreSQL, authentication, back office, client portal, China-to-Madagascar tracking and operational notifications.
- Interoperates with Fretunia through an API without requiring Fretunia for the product to operate.

JN Travel - full-stack cargo-tracking application and PWA | <https://jntravel.mg>

- Delivered a React PWA with a Next.js/Node.js backend, PostgreSQL, authentication, back office and mobile-oriented cargo-tracking client portal.
- Used Dexie.js local persistence to support continuity of use under degraded network conditions.

AIM Madagascar | Full-Stack Web/Mobile Developer | <https://dms-aim.online/>

October 2023 - present | Madagascar | Development contract

- Designed Express/Sequelize/PostgreSQL and REST API flows for beneficiaries, cashiers, payment periods, payments, adjustments, post-closing corrections and business controls.
- Delivered a React/Vite back office and Flutter application with batch synchronization, partial/refused payments and network-incident recovery.
- Implemented controlled financial exports, sensitive-action audit and safeguards for workflows handling confirmed volumes from 500M+ MGA to 2B+ MGA as system criticality.

Infrastructure and field foundation

- **Action Against Hunger International | IT Infrastructure Officer | January 2024 - June 2024:** networks, Microsoft 365, backups, cybersecurity, L2/L3 support and field operations.
- **FID and INSTAT | 2021 - 2023:** beneficiary data, transfer reconciliation, Excel/MIS/ODK, offline/online CAPI collection, GPS, cloud backup and field mobile connectivity.

Professional method

Structured use of development agents to accelerate implementation, testing and documentation, with specifications, human review, security validation and final accountability.

Education and languages

Bachelor-level degree in Computer Science (Bac+3) | 2016 - 2022

French: fluent | **English:** B2, professional proficiency
